

Activities of librarians in EU projects

The funding of European Union funds for the implementation of projects is available to every citizen of Latvia who has a clear idea of promoting public welfare, economic growth and sustainable development. Funds are invested in Latvian infrastructure, energy security, economic modernisation, rural development and labour productivity, support for Latvian businessmen and scientists, as well as various cultural and social sites.

Wider travel opportunities, cheaper talks, studies in other EU countries, security in Latvia.

We go along with the spirit of the era and take advantage of it! Participation in conferences, working experience trips, reading festivals are organised for pupils, meetings with poets, writers, funding is supported by European Union programmes.

Smart-used technologies are able to make our lives more comfortable. We all go along with time and all participate in building a Europe that meets the demands of the digital era. We are digital agents: collecting and processing data and learning from the best examples of other countries so that the public can deliver the services they need in the best way.

Read promoting festival in Dagdas region.
